

Business Continuity Policy

Why is this an important issue for Van Loon Group?

Every day, we deliver a large quantity of products to our customers. They expect these to be available at all times. To minimise the risk of late delivery due to an emergency, we have implemented a Business Continuity Management System (hereinafter: BCMS).

Scope

Our BCMS focuses on minimising the risk of potential major disruptions and on minimising the impact of a disaster on the business continuity of Van Loon Group. It covers all parts of Van Loon Group.

Our Policy

We strive to minimise the impact of disruptions on the Van Loon Group's operations. Our ambition is to ensure that our customers can be supplied with our products at all times. We achieve this by implementing and maintaining a robust and resilient BCMS. This enables us to respond effectively to disruptions and resume our business operations as quickly as possible. By practising scenarios and evaluating the effectiveness of the system, we are constantly working to improve our business continuity plan. The system is certified in accordance with the ISO 22301 standard.
